Stuart Highway Road Safety Improvements Stuart Park

Dear Stakeholder,

The Department of Infrastructure, Planning and Logistics (DIPL) is preparing to undertake detailed design for road safety improvements on the Stuart Highway, from Armidale Street to the Westralia Street intersections in Stuart Park.

The project will enhance road safety for all road users and improve traffic flow at intersections by separating the turning traffic from the through traffic, and pedestrians and cyclists from vehicles.

Preliminary concept designs have been developed and DIPL is seeking your feedback to inform the final scope of the detailed design project.

The concept design includes:

- dedicated left-turn lanes for Armidale Street, Eden Street, Charles Street, and Westralia Street from the Stuart Highway
- full protection for pedestrians and cyclists at the traffic signals of the Stuart Highway/ Westralia Street intersection
- line marking and signage for improved delineation and channelisation.

This project is in its early design planning stage and any construction to complete the project will be subject to availability of funding once the detailed design is completed.

For more information about this project and to provide your feedback, please contact DIPL Project Manager Aftab Abro on phone 08 8924 7121 or email aftab.abro@nt.gov.au.
