

JANUARY 2019

STATE SQUARE UNDERGROUND CAR PARK – TRAFFIC DELAYS EXPECTED

Dear Stakeholder

A crane will be operating on the new state square underground car park between 6am to 5pm on 12, 19 and 20 January 2019.

The work being undertaken consists of installing precast concrete wall panels that will form the outer wall of the underground carpark. Panels will be installed vertically with each panel being the full height of the carpark, each panel is 3metres wide and 10metres tall.

Traffic management and control will be in place while the crane is in operation and minor traffic delays are expected.

The map provided explains the traffic and pedestrian diversions that will be in place during the works. Access to the parking in the work zone next to the site will be unavailable during the works.

The new underground car park is the next step into rejuvenating Darwin city and making it a cooler and more public-friendly facility and attraction. The facility will have space for 450 cars, including public parking and have a dual role as a cyclone shelter.

We appreciate your patience during this time.
